We call the attention of our readers to the advertisement of the Stanford Female College in another column. His long and successful career certainly places President Pinkerton in the front rank as an educator. Under his efficient management our college bids fair to recover its old time prestige and popularity as one of the best schools in the State for the higher education of the girls and young women. It is a rare thing that both patrons and pupils are pleased with the work done in a school, but so far as we have heard, everybody was delighted with the work done in the college last session.

President Pinkerton is a Kantian. To the man, born, a cultured, christian gentleman, a man of strong, positive personality, a competent, experienced and successful educator, just the man we think, to mould the character and train the minds of our children, and this community, we believe, will stand greatly in its own light if it does not rally to his support and give him the patronage needed to make the college one of the best of the leading schools for girls in the South.

BURGARS entered T. Chensault Willet's kitchen the other night and helped themselves to a small amount of flour and meal. He gives them a cord invitation to call again.
